PROFESSIONAL PROFILE

Creative and detail-oriented Digital Designer & Front-End Developer with experience building responsive, user-centric web and mobile designs. Skilled at translating brand identity into digital products, developing design systems, and collaborating with cross-functional teams (Design, Marketing, Engineering) to deliver pixel-perfect, accessible, and high-performing digital experiences. Strong problem-solver with advanced English and proven ability to manage multiple priorities in fast-paced environments.

HIGHLIGHTED PROJECTS

E-commerce Fullstack Platform | React, Spring Boot, MySQL/H2, JWT, Docker, AI-Assisted Development

Fullstack e-commerce application developed as part of an academic project. The system offers a complete online store experience focused on gaming and computer hardware, including authenticated shopping, product management, and administrative dashboards.

The development process leveraged AI tools for documentation, architecture planning, and partial code generation, and used Docker for environment consistency and deployability.

- Role: Fullstack Developer
- Key achievements: Built a full CRUD for products, categories, users, and orders. Implemented JWT authentication, protected routes, and session handling. Developed client-server integration between React frontend and Spring Boot API. Designed and implemented a dashboard with filtering, categories, and admin features. Configured H2 database for development and MySQL for production deployment. Created and deployed Dockerized services to standardize backend and database execution. Integrated AI assistance for code generation, REST documentation, and architectural decisions. Connected frontend components with backend endpoints; managed global and local state efficiently.

Backend Project | Node.js, Express, MongoDB, EJS, JWT, Nodemailer

E-commerce backend API with JWT authentication, product and cart CRUD, order management, messaging system, and email notifications. Environment variables (.env) and Postman collections included.

- Role: Backend Developer
- Key achievements: REST endpoints, authentication middleware, layered architecture (DAO/services), and EJS templates.

Ecommerce (monorepo) | React (Front), Node/Express (Back)

Fullstack architecture with separated frontend, backend, and admin modules. Demonstrates end-to-end flow: UI, API, and admin dashboard..

- Role: Fullstack Developer
- Key achievements: Frontend and Backend integration, reusable components, CRUD endpoints, routing

Portfolio Personal |React + Vite, ESLint

Personal portfolio website showcasing projects and skills, built with a modern stack (React + Vite).

- Role: Frontend Developer
 - Key achievements: Component-based architecture, optimized assets, SEO-friendly structure.
-

WORK EXPERIENCE

Judicial Investigation Coordination Office | Buenos Aires, Argentina

Investigation Agent | Feb 2023 – Present

- Prepared technical documentation and managed digital data.
- Provided process coordination and IT support to multidisciplinary teams.

Governmental Control Agency | Buenos Aires, Argentina

Inspector | Feb 2020 – Feb 2023

- Coordinated operations and administrative processes using digital tools.
- Assisted citizens and drafted technical reports.

Public Space Control Department | Buenos Aires, Argentina

Inspector | Dec 2017 – Dec 2019

- Organized and controlled processes with digital documentation support.
- Public attention and administrative reporting.

GTC Ribbon | Buenos Aires, Argentina

Executive Assistant | Oct 2015 - Mar 2016

- Administrative tasks and digital documentation.
 - Inventory management and operational support.
-

EDUCATION

Universidad Argentina de la Empresa (UADE)

Associate Degree in Software Development | Aug 2018 - Present

Coderhouse

Fullstack Developer | Feb 2022 - Apr 2023

Villa Devoto School

Bilingual High School Diploma in Science and Humanities | Jan 2008 - Dec 2014

CERTIFICATIONS

- **Introduction to Professional Skills in Data Analysis, LinkedIn**
 - **Professional Foundations of Data Analysis, Microsoft and LinkedIn**
 - **Learn Data Science: Basic Concepts, LinkedIn**
 - **Learn Data Analysis, LinkedIn**
 - **Red Hat System Administration, Redhat Rhcsa & Rhce Linux**
 - **Network Basic Course, Cisco Networking Academy**
-

SKILLS

- **HTML5, CSS3, JavaScript (ES6+) – advanced**
 - **React.js & React Hooks – advanced**
 - **Tailwind CSS – advanced**
 - **Node.js & Express.js – intermediate**
 - **SQL & MongoDB – intermediate**
 - **RESTful APIs – intermediate**
 - **Git & GitHub – advanced**
 - **Responsive Web Design – advanced**
 - **UI/UX principles – intermediate**
 - **Deployment (Netlify, Render, Vercel) – intermediate**
 - **Agile / Scrum methodologies – intermediate**
 - **Bootstrap CSS — advanced**
 - **Vue.js — intermediate**
 - **Wordpress, Elementor — intermediate**
 - **Power BI — intermediate**
 - **Springboot — intermediate**
 - **Java — intermediate**
 - **Docker — intermediate**
 - **TypeScript — intermediate**
-

LANGUAGES

- **Inglés avanzado (C1) - oral and written**
- **Español - native**
